

## HIGGINS FOURTH CONVICT

## HAMILTON JURY CONVICTS A TIP-TONITE OF CRIMINAL ASSAULT.

Two Co-Defendants of Higgins Are Out on Bond, and Will Be Tried at Once for the Identical Offense.

## TWO KILLED, ONE WILL DIE

## FAMILY OF THREE STRUCK BY BIG FOUR TRAIN NEAR GULFORD.

Other Accidents—Special Meeting of the Workers—Death of Alexander W. De Long—Other State News.

## Special to the Indianapolis Journal.

NOBLESVILLE, Ind., Oct. 18.—After five days of a bitter legal contest, a verdict was returned this afternoon finding James Higgins guilty of criminal assault on Rachel White, the penalty for which is a term of one to twenty years in the penitentiary. The jury was out but one hour, and found Higgins guilty on the first ballot.

This case came to this county on a change of venue from Tipton county. Motion for a new trial will be heard Monday, Oct. 27. With Higgins were indicted Harry Gosard and John Stoupe, who are out on \$5,000 bond each. Their trials will follow.

The case has aroused great bitterness among the relatives of the persons interested, and trouble has been looked for during the trial.

## MOTHER AND CHILD KILLED.

## Family of Three Struck by a Big Four Train—The Man Will Die.

## Special to the Indianapolis Journal.

GULFORD, Ind., Oct. 18.—Jacob Miller and his wife and child, of Wright's Corner, were struck by an eastbound train on the Big Four, due here at 5 o'clock this afternoon.

Mrs. Miller was killed instantly. The child lived only a few minutes and Miller was terribly injured, his legs and arms being broken. He is not expected to live. The buggy was demolished and the horse terribly cut.

## His Upper Jaw Broken.

## Special to the Indianapolis Journal.

NEW CASTLE, Ind., Oct. 18.—While connecting a gas well near Lewisville yesterday Marshall Higgins was seriously and dangerously injured in a peculiar manner. In releasing the cap from the well the force of the gas threw the wrench from Higgins' hand, striking him in the face and breaking the upper jaw bone in three places, leaving it hanging loose. It also cut the flesh through to the mouth cavity in several places. On the left side of the face the fracture of the jaw bone and the difficulty in keeping the bones in position the accident is considered very serious. The pressure of the gas was 180 pounds.

## Missing Bodies Are Found.

## Special to the Indianapolis Journal.

TERRE HAUTE, Ind., Oct. 18.—The body of Anthony Havens, the man in charge of a car of poultry and who was in the wreck on the Big Four Wabash river bridge a week ago last night, was found in the river below the bridge. There was a long rash in his head and his left leg was broken. Havens' home was at Hilltop, Ill. The body of Brakeman Fred Fuqua was found this afternoon on a sandbar. His head was crushed, and it is supposed he was instantly killed when the engine destroyed the caboose in which he and Havens were riding.

## Killed by a Long Fall.

## Special to the Indianapolis Journal.

WABASH, Ind., Oct. 18.—Clayton Bates, son of Letter Carrier, W. W. Bates, of this city, was killed to-day in Louisville. In attempting to board a Kentucky & Indiana suburban car at Fourth street he tripped and fell from the trestle platform to the pavement forty feet below, his neck being broken. He was twenty years old. The body was brought to this city.

## Killed by a Vandall Engine.

## Special to the Indianapolis Journal.

BRAZILL, Ind., Oct. 18.—This afternoon John Heller, aged sixty-five, was instantly killed by being run over by a Vandall switch engine. His brother was almost blown to atoms a few years ago by an explosion at the furnace here, and his nephew was killed two weeks ago in a freight wreck on the Vandall just east of town.

## WILL BEGIN WORK MONDAY.

## Union Traction Company to Rush Its Elwood-Tipton Extension.

## Special to the Indianapolis Journal.

ELWOOD, Ind., Oct. 18.—There are signs of renewed activity in the construction of the Union Traction Company's electric line from this city to Tipton. For more than two months all of the track, except two crossings and half a mile of rails, has been in and during all that time practically nothing has been done except a little ballasting in the western part of this city. The company was forced to secure an extension of time from Oct. 1 to Nov. 1 to have its cars running to Tipton, and it will take day and night work to be ready by the latter date.

## Option on a Right of Way.

## Special to the Indianapolis Journal.

NEW ALBANY, Ind., Oct. 18.—The New Albany, Paris & French Lick Valley Traction Company, which was recently organized for the purpose of building an interurban line between this city and French Lick and West Baden Springs, has obtained an option on the toll road of the New Albany and West Baden Traction Company for \$50,000. The company has secured rights of way through all the counties through which the line will run and the city council will act next Monday night on an ordinance granting the company a franchise to enter this city.

## INDIANA OBITUARY.

## Alexander W. De Long, the Pioneer Editor of Huntington County.

## Special to the Indianapolis Journal.

HUNTINGTON, Ind., Oct. 18.—Alexander W. De Long, founder of the Huntington Herald, the pioneer editor of this county and a prominent citizen for over half a century, died this morning after a long illness.

He came to Huntington with his father, Maj. Isaac De Long, in 1847, when but nineteen years old, and had made this city his home continuously since that time. He edited the subscription list of the Weekly Herald, and bringing the material by canal from Cincinnati, issued the first number on July 3, 1848. He was postmaster here for several years, and held the position of receiver of public moneys at Precinct, Ariz., for a short time in the early thirties. He was an active and influential Republican, and at one time was a member of the state central committee.

Mr. De Long was a strong man, mentally and physically, and a vigorous editor. In war times he stood for the Union, and was a power in molding public sentiment in this vicinity. He was born in Quercy county, Ohio, and was in his

seventy-fourth year when he died. His aged widow and one married daughter survive.

## Other State Necrology.

MARION, Ind., Oct. 18.—James Smith, aged sixty, died yesterday. He was a poor farm. He was one of the best known men in Grant county a few years ago. He was in Grant county a few years ago. He was in Grant county a few years ago.

SHELBYVILLE, Ind., Oct. 18.—Mrs. Mary Huggie died at her home in this city last night. She was born in Prussia, Baden, Germany, on Dec. 24, 1824, and came to America in 1847. She left her husband and two sons.

## OLIVE BRANCH SYNOD.

## Programme for the Sessions to Be Held at Richmond This Week.

## Special to the Indianapolis Journal.

RICHMOND, Ind., Oct. 18.—The Olive Branch Synod, to which St. Paul's, the First and Second English Lutheran churches of this city belong, will convene next Tuesday evening in the First English Lutheran Church. Over one hundred delegates from southern Indiana, Kentucky and Tennessee are expected to attend. The day sessions of the synod will be devoted to business after the synodical communion service on Wednesday morning. The sermon at that time will be preached by Prof. B. P. Prince, of the Springfield O. The evening session will be of a popular character. The Rev. J. W. Kapp, D. D., of Cincinnati, has been invited to preach the opening sermon on Tuesday evening at 7:30.

The service on Wednesday evening will be under the auspices of the W. H. and F. M. Society of the synod, whose convention will be held simultaneously with that of the synod. The Rev. Noah E. Yeiser, a returned missionary, will deliver an illustrated sermon on Thursday evening. The address of Thursday evening will be by the Rev. H. E. Simon, of Indianapolis, on "The Lutheran Church Towards the People." Towards the Practical Questions of the Day," and by the Rev. A. K. Mumma, of Ellettsville, on "The Relation of the Adult Membership of the Church Towards the Sunday School."

## Conference of Mennonites.

## Special to the Indianapolis Journal.

PORTLAND, Ind., Oct. 18.—A membership of over 10,000 is represented at the Mennonite conference now being held at Berne, Adams county. The 70 delegates coming from sixty-nine congregations. The visitors come from all parts of the United States and Canada. This General Conference is an advisory board, which in no way interferes with the affairs of the congregation, but is time to matters of home and foreign missions and to the union of Mennonites in the country. In the country the Mennonite Church has 75,000 members, but the congregations are almost completely independent of each other.

## SUDDEN DROP IN PRESSURE.

## Unusual Variation Noted in the Indiana Gas Pipe Lines.

## Special to the Indianapolis Journal.

HARTSFORD, Conn., Oct. 18.—All the big gas pipe lines which secure their natural gas supply from this section of the gas belt claim to have experienced a singular and unexplainable phenomenon in the gas pressure Friday. The pressure decreased to an alarming extent and was general in all the lines of the various pipe line companies in the whole gas belt, the officials say. C. C. Gano, of the American Window Glass Company, became alarmed and ordered the supply to the Diamond Flint Glass Company shut off, as at the time the gas was needed at the Diamond Flint Glass plant owned by the corporation. The day the pressure was as strong as usual and the most expert gas men of the state are unable to explain the phenomenon. The Fort Wayne Gas Company and the Johnston Gas Company claim to have experienced the same difficulty.

## REQUISITION DENIED.

## Governor Yates Refuses to Surrender a Criminal to Indiana.

## SPRINGFIELD, Ill., Oct. 18.—Governor Yates to-day refused to honor a requisition from Governor Durbin, of Indiana, for the extradition of Archie Tonica, wanted in Lafayette, Ind., on a charge of robbing Delos Thompson, wealthy banker and coal mine owner, of \$200 worth of diamonds.

The Governor declined to issue the warrant on the ground that Tonica is now under bonds to await the action of the Sangamon county grand jury on a charge of robbing three jewelers of Springfield and that the local courts have jurisdiction in the case.

## TIN WORKERS' CONVENTION.

## Elwood Sends Delegates Instructed to Vote for a Reduction.

## Special to the Indianapolis Journal.

ELWOOD, Ind., Oct. 18.—William O'Brien, Charles Lewis, John Jones, Frank Piggott, T. E. Daley and Frank Zohn left for Pittsburg to-day to attend the conference of the tin working members of the Amalgamated Association of Iron, Tin and Sheet Workers, which will begin there on Monday. They go as delegates from McHenry Lodge, No. 1, of this city, having been instructed to vote in favor of granting the 25 per cent. reduction in wages which has been offered by the company, so far as it applies to the million-and-a-half-box order for the Standard Oil Company.

## Poisoned by Ginger Cake.

## Special to the Indianapolis Journal.

BLOOMINGTON, Ind., Oct. 18.—The family of Marion Rice, at Ellettsville, was accidentally poisoned by eating ginger cake yesterday noon, and for a time it was feared that the result would be the death of one of more of the children. Mrs. Rice had a ginger cake for dinner, and in making up the dough got hold of some pecan poison used in spraying potato vines, instead of ginger. The cake was placed on the table at dinner, and Mrs. Rice, her three children and her sister, Miss Myrtle Carpenter, of this city, all ate freely. Soon after dinner became seriously ill, and soon several physicians were in attendance. After several hours of suffering all became better and are now out of danger.

## C. R. &amp; M. Sued at Marion.

## Special to the Indianapolis Journal.

MARION, Ind., Oct. 18.—The P. C. C. & St. L. Railway Company expresses a fear that the Cincinnati, Richmond & Muncie Railway Company will injure its business in Marion, and asks that the latter be enjoined from competing with the latter in this city, which runs to many of the leading manufacturing concerns. A temporary restraining order, which enjoined the establishment of such contemplated connections, was issued to-day by Judge Paulus, of the Grant Circuit Court, and the case will be argued on request for permanent injunction Oct. 29. The Toledo, St. Louis & Western Railway Company is also made a defendant with the C. R. & M.

## Good Sale of Oil Property.

## Special to the Indianapolis Journal.

WABASH, Ind., Oct. 18.—The largest sale of oil property ever made in the county was completed this morning when the Nonotuck Oil Company, composed of employees of the Wabash Paper Company, disposed of its leases, rigs and wells in the Rich valley district, six miles west of this city, to a syndicate of Ohio men. The price paid was on the basis of \$500 per acre, and the total amount was \$100,000. The company has been very successful, and has

YOUR CREDIT IS GOOD AT THE RELIABLE.

## THE RELIABLE'S Smokeless Floor Heater

Fourth year on the market. 2,000 in use in Indianapolis to-day. One thousand testimonials. Read all about it and come see it operate.

## COMBUSTION

All combustible matter, whether it be mineral or vegetable, or, in other words, coal or wood, is composed of the same chemical ingredients, and are as follows: HYDROGEN, CARBON, OXYGEN, NITROGEN, SULPHUR, MOISTURE, and ASH. The different climates and atmospheric conditions are, to a great degree, responsible for the variations of the ingredients, therefore constitutes the different kinds of fuel. Anthracite, commonly called hard coal, contains 1 per cent. Hydrogen, 86 per cent. Carbon, 1 per cent. Oxygen, 1 per cent. Nitrogen, 1 per cent. Sulphur, 1 per cent. Moisture, and 10 per cent. Ash. Bituminous coal, commonly called soft coal, contains 5 per cent. Hydrogen, 56 per cent. Carbon, 11 per cent. Oxygen, 1 per cent. Nitrogen, 3 per cent. Sulphur, 11 per cent. Moisture, and 13 per cent. Ash.

There are some fuels that contain only 6 per cent. Ash and the other ingredients vary in proportion, but the above table will give you the two extremes. Chemists have known for centuries the contents of fuel and up to the present time appreciate the great loss in the old mode of combustion. Millions of dollars have been spent by manufacturers of devices for burning fuel, experimenting to use all the ingredients of fuel, but up to the time of the construction of the Reliable Smokeless Floor Warmer have failed. Since the device constructed in this stove, the different stove manufacturers have copied it near as the patent law would permit, but the points of importance in this device that do the work are protected by patents in all countries in such a way that the other manufacturers cannot construct a stove on the principle governing this one, because they will not themselves be liable. There is only one way to utilize or consume the entire substance or all the ingredients of any kind of fuel, and that is by taking the air below the surface of the fuel, where it is taken in by the back damper in our heaters. If you can produce a stove that HAS A DAMPER IN THE REAR OF THE STOVE and at a point where the BACK DAMPER is constructed like in our stove, the manufacturers authorize us to give you one of these stoves free of charge. You will find all other stoves that claim to burn smoke and all products of combustion to take the air through the damper, either on TOP OF THE FIRE POT RING or through a tube from the TOP OF THE STOVE, or from a point ABOVE THE SURFACE OF THE FUEL. By this method it is impossible to heat the oxygen of the air sufficiently to ignite the gases or produce PERFECT COMBUSTION, consequently it is the same as the old mode of combustion that governs the old stoves manufactured to-day and which, according to statistics, incur a loss of 80 per cent. in the use of soft coal and all other fuels in proportion.

## CLEANLINESS

This Stove will produce less ashes than any other stove on earth, with any kind of fuel. The ash pan is large and requires emptying about half as much as any other stove. There are no doors to open when raking or poking a fire—hence no dust can escape, as in other stoves. It is the Cleanest Stove that has ever been made in the history of the stove industry, and is a pleasure as well as a comfort to every housekeeper.

## The Reliable FURNITURE AND CARPET CO.

## FUEL

This Stove burns anything and consumes everything, making no difference what sort of fuel is used. It will burn Hard or Soft Coal, Coke, Wood, Lignite, Soft Coal Slacks, Shavings, Paper, Sawdust; in fact, everything that is combustible. We call special attention to the successful way that this Stove will burn soft coal slack with better results and more cleanliness than hard coal will operate in a hard coal base burner, as the scientific workings show that the smoke and gases are extracted from the fuel first, which is burnt up and leaves the slack in the form of coke and then burns up the coke. This method shows that all the products of the fuel are consumed, thus producing a very hot fire and doing away with all the dust that has heretofore been occasioned in hard coal base burners. The cost of soft coal slack is very small, and it has been estimated by people who are using this Stove to-day that four tons of slack will heat five rooms all winter. Consider what a difference this will make in your coal bills, with the heat more regular, the fire easier started, the cleanliness and comfort you are sure to receive. We have this Stove in operation daily at our store, burning just such stuff as SOFT COAL SLACK, and invite everybody at any time they see fit to call to investigate the operations as laid down in this paragraph.

## FIRE KEEPING PRINCIPLES

The jointless leg bottom and base makes the Stove air-tight below the grate, which is the only true fire keeping principle. This heater will hold fire forty-eight hours. The dampers can be so arranged to keep a slow fire or a very hot fire for hours at a time, just as the weather may be. This Stove can be regulated to heat one room or three rooms, and its simple workings can readily be understood after one explanation. This is a great feature of this stove, as its fire-keeping principles are better than any other stove in the world, and you work it with greater ease and are assured of more comfort at least expense. It is the only perfect floor warmer manufactured to-day, and the only absolute Smoke Consuming Stove on Earth.

## FEEDER

The Feeder, or Magazine, is a detachable coal chamber running from the top to the fire pot of the stove. This can be filled so that the stove feeds its own fire, thus preventing the annoyance of putting in fuel from the feed door. It is an indispensable article in using hard coal, coke or slack, and this attachment makes this the cleanest stove in the world. Its additional cost is quite small, and is made to fit all sizes.

## TERMS

Our credit terms will be arranged to suit all pocketbooks. This stove is made in different sizes and the prices are regulated according to the size. You can pay a little down and the balance in trifling sums, either weekly or monthly, which will be arranged for you at our office at time of sale. Don't stay away from want of cash, and see that you get one of the RELIABLE SMOKELESS FLOOR WARMERS before cold weather comes.
